## SUMMARY

Full Stack Web Developer with over a decade experience in Retail Management and a dedication to learning new technologies. Effective at combining creativity and creative problem solving to develop user-friendly applications. Known among staff and peers for strong determination and attention to detail when executing projects.

## TECHNICAL SKILLS

Group Technical Skills into categories without bullet points or tables. See sample categories.

### **Languages:**

HTML5, CSS3, JavaScript, jQuery, Bootstrap, React.js, Node.js, C#, .Net, Database Theory, Bookshelf.js, MongoDB, MySQL, Command Line, and Git.

## PROJECTS

### **Tattoo4U | [github.com/ABooth9422/Project1](https://github.com/ABooth9422/Project1) | [aboorth9422.github.io/Project1](https://aboorth9422.github.io/Project1)**

We wanted to make it easy for people to be able to locate tattoo shops based on the “style” that they are interested in. A lot of people that want a tattoo do not know how to properly research who is right to do that tattoo. With our application you will be able to search the local shops in the area that is selected and the results for the style selected will display the tattoo shop which is deemed to specialize in that style.

- The core responsibility I had in the project was the design and making sure that the Results that came back from the AJAX calls were formatted appropriately for the site.
- Languages used: CSS, Javascript, JQuery
- Technologies used: Mapquest API, Yelp API, Google Firebase

### **Designated Kicker | [github.com/ABooth9422/Project2](https://github.com/ABooth9422/Project2) | [blooming-atoll-38469.herokuapp.com](https://blooming-atoll-38469.herokuapp.com)**

The goal of this project was for an inventor to take the idea they may have to see if it had been done before. We use our custom search to look for the results based on the users input or not to see if someone has invented a product like theres or a similar idea. After the user sees the results we give them an opportunity to host there project through us.

- In the project I was responsible for handling the front end design as well as the routes for when the server would respond and what content would show from the server.
- Languages used: CSS, Javascript, JQuery
- Technologies used: Animate.CSS, Bootstrap, Handlebars, Node, MySQL, Sequelize, Heroku, Google Custom Search API

## **EXPERIENCE**

**Technical Support / Hardware Installer**  
**Netsafe Solutions**

**March 2019- Present**  
**Charlotte, NC**

Daily responsibilities are to ensure that all customers networks are operational if stationed at the help desk. When a customer calls in to report a problem working with the client to make sure the problem is resolved timely During a customer install to make sure all equipment is functional and make hardware suggestions of what they need to upgrade based on there network setup.
